

CE HGV Growth Formula - English

PFC 1(C)(I)(a)(ii): Compound solid inorganic macronutrient fertiliser NPK 3-6-22 (2.5 MgO) with Micronutrients Boron (B) (Boric Acid), Iron (Fe) (Fe-EDTA), Molybdenum (Mo) (Sodium Molybdate).

Content declaration:

Total Nitrogen (N): 3.0%

Nitric Nitrogen (N): 3.0%

Water soluble Phosphorus Pentoxide (P_2O_5): 6.0%

Water soluble Potassium Oxide (K_2O): 22.0%

Total Magnesium Oxide (MgO): 4.15%

Total Boron (B): 0.02%

Iron (Fe) Chelated EDTA: 0.15%

Total Molybdenum (Mo): 0.008%

List of ingredients:

Magnesium Sulfate (CAS n°7487-88-9 CMC1: virgin material substances and mixtures), Potassium nitrate (CAS n°7757-79-1, CMC1: virgin material substances and mixtures); monopotassium phosphate (CAS n°7778-77-0 CMC1); potassium sulfate (CAS n° 7778-80-5 CMC1); iron EDTA (CAS n° 15708-41-5 CMC1); Orthoboric acid (CAS n° 10043-35-3 CMC1); sodium molybdate (CAS n°10102-40-6 CMC1).

Formulation: soluble granules

Poor in chloride. Low cadmium (Cd) content. Iron chelated by EDTA is stable in the pH range 4-11. To be used only where there is a recognized need. Do not exceed the application rate.

Directions for use:

This fertilizing product is indicated in a balanced crops nutritional program and in case of specific crop deficiency of macro and micronutrients to the crops. Use in accordance with the recommendations of a qualified individual or institution or according to an approved nutrient management plan.

Visit [neto masa](#) for more information on crop nutrition.

Storage conditions:

The product does not require special storage measures, as general storage conditions sources of heat, radiation, electricity and contact with food should be avoided. Store the containers between 5 and 35° C, in a dry and well-ventilated place. Store according to local legislation. Observe the directions on the label.

When properly stored, the product will remain stable with no expiry date.

Net weight 11.3 kg
